It does not meet the criteria.	Delete LGSNWOOT003	The site is a gap in an otherwise built up frontage, which lends a rural character to the settlement. However, views across the site are very local in character. The Cider Mil is an attractive traditional buildings but is not of such significance that it is a significant feature of the wider village. The site has some wildlife value and is adjacent to a traditional orchard, but the richness of its wildlife is not of such significance that it justifies designation. The site has some value but is not of such significance that it meets the criteria for designation as LGS. Remove the designation from this site. Change proposed.
