

Case Study

Through Wessex Resolutions partnership with Frome's 'Solar Streets' project Mr and Mrs M have been able to afford to power their home using renewable energy. They are so happy to have made this change at an affordable price and have seen a decrease in their energy bills already.

They said "The rates are good and the application process is so straightforward that it all happened so quickly. I love the way Wessex Resolutions is partnering with local councils and private companies to actually make things happen in our community".
